

## Infinite Campus Communiqué # 3

Greetings.

Congratulations to all on the completion of another successful school year.

This is to update you on progress toward migrating to Infinite Campus (IC) and changes that will occur.

Training on IC will continue throughout the summer. Visit <http://www.mylearningplan.com> to register for appropriate training over the summer.

Scheduling for the 2008-09 school year will be imported into IC on June 20. After that time all scheduling will be done in the new environment.

IC will be opened for summer school staff on June 30. Teachers and other educators will have access in mid-July. You will be able to familiarize yourself with IC at this time. Log-on names and initial passwords will be released at the school level.

The Student Information Center currently providing data to teachers and staff at <http://www.sbac.edu/~research/InfoCenter.html> will become 'snapshot' data on June 10<sup>th</sup>. This means the data on this site will not update after this date. On June 30, the site will be taken down. The MIS Reports Page will continue through summer school for summer school reports. If you have other data needs during summer, contact the research department.

Moving from CICS to Infinite Campus will require recreating the hundreds of reports currently run by the MIS and Research departments. These will be prioritized to insure data continuity wherever possible. The reports that have the greatest impact will be given the highest priority. Please understand that special and 'one-off' reports may not receive as high a priority. We will be taking advantage of this opportunity to retire less than useful and redundant reports, and to combine and reconfigure others.

We hope you a restful and rewarding summer and look forward to working with you on your return.

The Infinite Campus Implementation Team
