

School Protocol for Covid Related Concerns for Community Use 10/20/20

(NOTE: DOH refers to the Alachua County Department of Health)

| Student Exhibits COVID-like Symptoms | Student Tests Positive for Covid-19 | Student Has Had Contact with Someone Testing Positive |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms <u>may</u> have COVID-19:</p> <ul style="list-style-type: none"> ● Fever or chills ● Cough ● Shortness of breath or difficulty breathing ● Fatigue ● Muscle or body aches ● Headache ● New loss of taste or smell ● Sore throat ● Congestion or runny nose ● Nausea or vomiting ● Diarrhea <p>This list does not include all possible symptoms. It will be updated based on recommendations from CDC and local medical advisors.</p> <p>School nurses will use medical history, interview with student/parent and latest recommendations to make the determination to send a student with symptoms home or back to class.</p> <p>Covid-like Symptoms</p> <p>If symptoms are new or otherwise unexplainable, parent/guardian will be contacted and required to pick student up from school as soon as</p> | <p>Administration will immediately notify the COVID Response Team in the case of a positive COVID-19 test result.</p> <p>Areas of the school requiring disinfecting will be closed off until cleaning protocols have been followed.</p> <p>Administration will contact the Facilities Department to implement additional cleaning/sanitizing procedures as appropriate</p> <p>Teachers, staff and families will be notified of positive test results. Identifying information will not be provided.</p> <p>Parent/guardian will be informed that other children in the home must quarantine for 14 days.</p> <p>For students with signed consent forms, DOH will offer testing at school or DOH on Day 3 and Day 9 from the date of exposure. A negative result on Day 9 will allow a return to class on Day 10, EXCEPT when the positive case is in the household. In that case, the student must remain home for 14 days.</p> <p>It is recommended that parent/guardian seek guidance from their medical provider and inform the doctor of the positive test results.</p> | <p>If a student has had significant contact with someone testing positive (being within 6 feet of the individual for at least 15 minutes in school or home/community) or seated in close proximity:</p> <p style="text-align: center;"><u>Elem/MS/HS:</u> students/staff who have had significant contact as defined above.</p> <p>Additional contacts may be identified based on advice from local medical advisors.</p> <p>Parent/guardian will be notified of the significant contact to someone testing positive and directed to pick up their student immediately if the student is in school.</p> <p>Parent/guardian will be informed that their student needs to self-isolate for 14 days following the exposure and be fever-free before returning to school.</p> <p>For those students with a signed consent form, DOH will offer testing at school or DOH on Day 3 and Day 9 following the exposure. A negative result on Day 9 will allow a return to class on Day 10, EXCEPT when the positive case is in the household. In that case, the student must remain home for 14 days.</p> |
