What is IB?

The International Baccalaureate (IB) Diploma Program is a prestigious, globally recognized curriculum designed to prepare you for the rigors of college. The blend of academic depth, critical thinking, and global perspectives equips you to succeed in university and your future careers.

For you, the IB curriculum offers a well-rounded and intellectually engaging education across six academic subjects plus The Core: the Theory of Knowledge (TOK) course, an in-depth Extended Essay (EE) research project, and Creativity, Activity, and Service (CAS) initiatives, which encourage personal growth beyond the classroom.

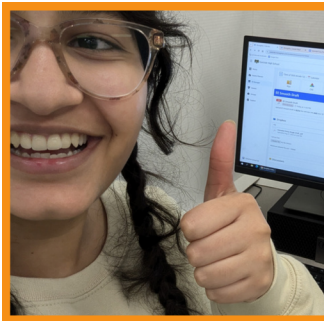

Our greatest hope is that IB students like you learn to become responsible global citizens.

The IB Diploma is offered in nearly 6,000 schools in 160 countries.

Eastside: The O.G.

Eastside's IB program, one of the first three established in Florida, has been a cornerstone of academic excellence since graduating its first IB class in 1987. Eastside has consistently led the district in educational achievements, producing many National Merit Scholars and students who achieve top ACT and SAT scores. Our graduates have attended some of the most selective universities in the world.

IB Math Progression

Math allows for many options, depending on your talents and goals for the future. Successful completion of Algebra 1 is a requirement for application to the IB Program. The following shows the general flow of math based on your point of entry.

Note, this is just a sample of typical progressions. You'll consult with our math department to make sure you're in the right place based on course completions, placement exams, and performance.
