

Checker Board

Cut 8 strips 12" X 1 1/2" white construction and 8 strips 12" X 1 1/2" black construction. Lay out all of one color, side by side. Weave other color, one strip at a time to create a black and white checker board. Flip complete checker board over and tape all strips in place. Laminate if desired. Mount onto a piece of posterboard for stability. Cut out tiny shapes from the Ellison dies in two contrasting colors (12 Green and 12 Red apples, for example) to use for playing pieces. Store playing pieces in a zip-loc bag.
